## Sound of Silence experience

“Music for Life and for a Better World” offers people a new view on our lives through diving and snorkeling with dolphins, turtles, aquatic colors of sea life and music of the Celtic harp. “Silence diving” in the Red Sea during the day and “sound bathing” in the vibrations of soft music after sunset. Reach the heart of life, in the memories of water capable of healing and while releasing all tensions. “When I remember my trip with Music for Life, these are the words that come to me: trust, discovery, guidance, freedom, beauty of nature, respect, meditation, magnificent underwater world, healing... There is a before and an after travelling together! Thank you!”
